Indoor Air Quality (IAQ)

Indoor air pollution can actually be worse for you then outdoor pollution! Let us

 212 . 801 . 2060

services@ptacinnyc.com

assess the air in your home and provide a solution that best fit your needs. We install air purifiers, humidifiers, pleated filters, air cleaners, UV treatments, and an array of ductwork services to improve IAQ.

Indoor Air Quality (IAQ)

Indoor air pollution can actually be worse for you then outdoor pollution. We can supply and install air purifiers and humidifiers, and we're certified in duct system design, installation, and cleaning.

Ordinary furnace filters trap only a minute percentage of bacteria, pollen, and dust mites. By utilizing an electronic air cleaner like Honeywell Perfect Climate system, you can eliminate up to 95% of the airborne particles in your home. In addition, it saves up 10 to 15% on your heating and cooling operating costs.

Humidifiers

Hot Air Furnaces cause the air in your home to be dry and stagnant. This not only threatens health by inflicting harsh breathing conditions, but it also poses as a threat to your home. The dry air can cause walls and ceilings to crack, considerable plant damage, and ultimately dry out all wood finishes. Installing a custom controlled humidifier will alleviate these concerns. We supply Aprilaire and Skuttle humidification systems, which are cost effective solutions that work to improve the

air quality in your home.

Duct Cleaning

Our duct cleaning service includes a thorough cleaning and sanitization of your entire duct system.
